

ESE 355 VLSI System Design

Spring Semester 2003

Catalog Data: ESE 355 *VLSI System Design*. Credits 4. Introduces techniques and tools for scalable VLSI design and analysis. Emphasis is on physical design and on performance analysis. Includes extensive lab experiments and hands-on usage of CAD tools.

Text Books:

1. Jan Rabaey *et al*, “Digital Integrated Circuits: A Design Perspective”, Prentice Hall, 2003.
2. Neil Weste *et al*, “Principles of CMOS VLSI Design : A Systems Perspective”, Addison-Wesley, 2nd Edition.

Instructor: Dr. Alex Doboli, 261 Light Engineering Bld., 632-1611, adoboli@ece.sunysb.edu

Goals: Upon completion of this course, the students will be able to develop, layout and simulate fabricatable designs of VLSI building-block modules, such as registers and arithmetic units, and medium-scale VLSI chips.

Prerequisites by Topic:

1. Logic Design - combinational and sequential.
2. Computer organization and microprocessors.
3. Electronics - MOS transistor theory.
4. Basic Network Analysis

Topics:

1. CMOS Device Characteristics and processing
2. Basic MOS Transistor Theory
3. Switch Level Simulation, Timing Analysis
4. Performance Estimation, resistance, capacitance, power, fall and rise times.
5. Transistor Sizing
6. Scalable Designs and Design Rules
7. Charge Sharing
8. CMOS logic families and circuit techniques.
9. Latch-Up and solutions.
10. Clocks and multiphase clocking.
11. VLSI Building Blocks - Inverters, Gates, Multiplexers, Registers, Arithmetic and Logic Units.
12. Hierarchical, modular and bit-sliced design techniques.
13. Pipelining and chaining Concepts.
14. Area-Time-Power Tradeoffs in VLSI Design
15. Design with standard cells.
16. Other VLSI Design Issues

Laboratory:

Unix workstations in Room 114, Old Engr Building will be used for homeworks & miniproject.

Assignment Schedule and Grading

Assignment	Start Date	Due Date	Points
Homework 1	week 3, 2003	week 4, 2003	5
Homework 2	week 6, 2003	week 7, 2003	10
Homework 3	week 7, 2003	week 9, 2003	10
Homework 4	week 9, 2003	week 10, 2003	10
Miniproject	week 9, 2003	week 15, 2003	20
Midterm 1	week 8, 2003		20
Final	exam week, 2003		20
Student portofolio	exam week, 2003		5

Important: Each student will submit at the end of the semester a portfolio of the work she/he did during the semester (homeworks, mini project, and tests). The portfolio will be submitted in both hard and soft copies. More info about the portfolio preparation will be given in class.
